

THE SOUL OF THE LOG HOME IS ALWAYS THE KITCHEN

THE HIGHFALLS MODEL

This beautiful home, located in Butler, Georgia, is a splendid example of the "Process 2000" home.

Patented

WOOD TREATMENT SYSTEM

"Process 2000"

The future is here today. Fireside's patented Wood Treatment System "Process 2000", helps prevent the problems that are of most concern to log home enthusiasts. Shrinkage, checking, decay, and the threat of wood destroying insects are virtually eliminated as our patented wood treatment system enhances nature's biology by minimizing the possibility of wood cell collapse and strengthening and protecting your logs from the heartwood out. In addition, this revolutionary new treatment ensures that you will experience minimal maintenance of your log home.

Fireside's goal has always been to produce the highest quality log home product possible. The introduction of "Process 2000" to the log home industry moves our products and their benefits to a new level of excellence for log home owners. Remember,

"You Don't Have To Buy From The Biggest To Have The Best Log Home"

FIRESIDE LOG HOMES

Beauty

Comfort

QUALITY

ISN'T THIS WHAT YOU'RE LOOKING FOR?

NATURE AT ITS FINEST

Innovation

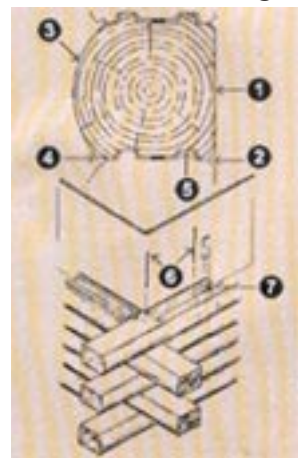

QUALITY begins with planning...

The hectic pace of urban life with its schedules, congestion, and sterility can be overwhelming. Mother Nature has provided us with an alternative - the natural beauty and comfort of solid log homes. Look to logs to provide the dependability,

affordability and practicality you are seeking for that often one time investment. Return to Nature and return to peace of mind

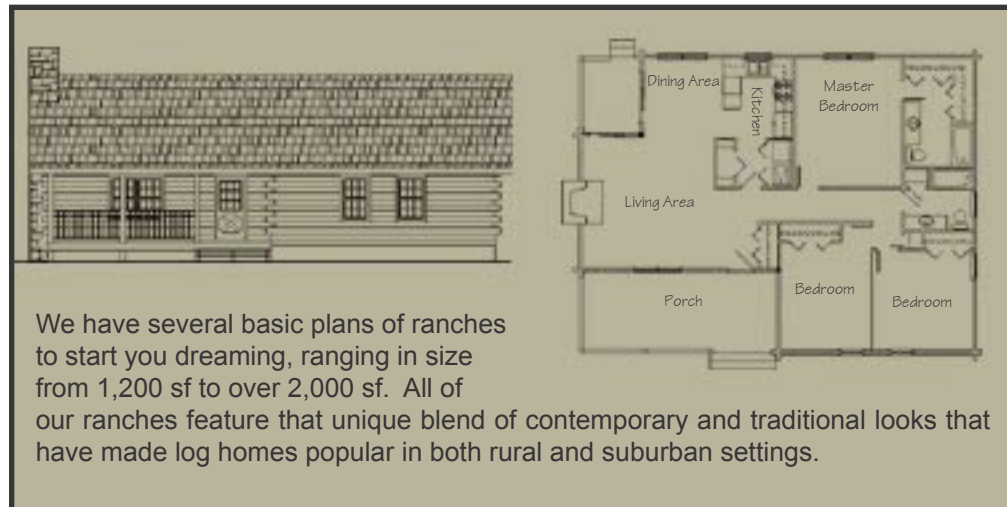

QUALITY in design...

1. A flat interior surface allows easy attachment of partition walls, trim, cabinetry, electrical switch plates, etc. while exposing the beautiful wood grain. It is easy to match with tongue and groove paneling on frame walls. The deep V-joints (2) adds a rich appearance. (3) The rounded exterior surface gives depth and that "real log" look. The milled surface is free from parasite hosting bark and chipped wood surfaces. (4) "Positive Drip Edge" allows water to run off easily. (5) The double tongue and groove bears the weight of the

wall without "roll" associated with larger wood to wood bearing surfaces. (6) Pre-cutting and pre-drilling for the use of steel 3/8" lag bolts allows for proper settling and maximum strength for fastening purposes.. (7) Our unique "Double Dovetail Spline" actually tightens the home as it ages.

INNOVATION
Beauty

We have several basic plans of ranches to start you dreaming, ranging in size from 1,200 sf to over 2,000 sf. All of our ranches feature that unique blend of contemporary and traditional looks that have made log homes popular in both rural and suburban settings.

QUALITY in materials...

Ease of construction, maximum performance, competitive pricing, and availability were primary considerations in the selection of Eastern White Pine and Western Red Cedar. Both of these woods are finely textured and are

used extensively by furniture manufacturers for their beauty, dimensional stability and their workability. The low density of both of these species provides a high insulation factor. To you, the buyer, this means energy efficiency with low cost comfort.

QUALITY in customer service...

Construction is a pleasure for even the inexperienced. We provide technical assistance by trained professionals. Whether you're a "do-it-yourselfer" or want a turn key project, we're with you all the way.

We also offer the diversity

of either a pre-cut log package, where the logs are already cut to allow rapid erection of the logs; or a lineal footage log package, which gives you extra flexibility on the site. There are advantages to each package, choose which is best for your needs.

QUALITY
Comfort

This beautiful chalet has 3 bedrooms, 2 baths, study loft, 2 porches, kitchen and 28' x 20' great room open to the high, beamed ceiling of the gambrel roof. The large triple windows give a contemporary flair to the traditional mood of the logs. This is only one of many floor plans available in our portfolio to serve as the starting point for the home of your dreams
